About us

When we create our collections we always ask ourselves if something adds *soul* to a room. We are always looking for ways to make a house feel like a home. It's all about making the *mood* right, understanding how to create an atmosphere and, for us, the art of mastering *light*.
That's what Zenza is all about and what we love to do.

We truly believe in the magic of good vibes. We work *ethically* and fair with our artisans. It's important to us that they can thrive and grow with us. We offer microfinance-loans, for example, so they can be owner of their workshop and create work and independence for themselves. We innovate together, but we also keep *traditions* alive through our products.

So many talented hands and creative minds have worked with us to make this new collection, it became a tribute to *handwork!* Some of our newest pieces are made from really special materials, nature's finest founds!

Getting curious?
We love to show you our creations in this brand-new catalogue and we are looking forward to another *Zenzational* year together!

With love,
The Zenza team

Home textile

Sabra is the name of this
"vegetable silk" from Morocco.

Aloe vera or agave cactus is used to produce these fibres and they are dyed with natural ingredients.

An artisanal process.

The clean and abstract motives are from Berber origin, often symbolising fertility and protection.

They're a pleasure to use at home because the pillows are super soft and wrinkle free.

Mix and match the different colors and sizes for a relaxed and playful effect!

Alabaster stone was already known by the pharaos in Egypt.

The skills nowadays are still used by *the local craftsmen*.

This work has been done over many generations and thousands of years. Both natural alabaster colours are the perfect soft colour for these beautiful disk lamps.

These lamps are adorned with a type of *crystal* named selenite from the Moroccan Atlas region.

The stone is named after Selene, the Greek goddess of the Moon.

The glow of the shimmery and pearl-like luster is like *moonshine* indeed!

Probably you know the *loofah* as a sponge for a good body scrub?

This vegatable has an incredibly detailed surface. It looks like *coral* and other precious materials from the sea.

We gave them a new fabulous life as poetic lampshades.
Often designs and patterns that are harvested directly from *nature* are the best!
